SEC Chairman Gary Gensler
Re: SEC Proposed Rule S7-10-22

Dear Mr. Gensler:

On behalf of the Louisiana Children's Museum, I am writing in support of proposed rule S7-10-22: The Enhancement and Standardization of Climate-Related Disclosures for Investors. Disclosure about climate-related risks, including greenhouse gas emissions, is a vital metric towards better management of our institution. The Louisiana Children's Museum is a private, non-profit organization and thus not a registrant to the Securities and Exchange Commission, but the institution nonetheless has standing regarding this proposed rule:

- The museum accepts the scientific evidence of climate change and has witnessed severe storms and hurricanes in recent decades. The new museum moved to a site that celebrates bioclimatic and resilience design while targeting a low 116 Energy Use Index (EUI). The museum continues to monitor emissions and energy use going forward.
- During the COVID pandemic the Louisiana Children's Museum provides green classroom spaces for 120 students from a local charter school with subsequent high performance scores. A low carbon building can teach climate positive lessons to a new generation of users.

The Louisiana Children's Museum recently received awards from the American Alliance of Museums and from the American Institute of Architects, among others. The Museum believes in the significance of proposed rules S7-10-22 to showcase the didactic values of carbon emissions and net zeros. The environmental health of children and their families is an overall smart investment and community benefit.

Sincerely,

A handwritten signature in cursive script, appearing to read 'Julia', is located below the 'Sincerely,' text.

Julia W. Bland
Chief Executive Officer
Louisiana Children's Museum
