Re: The Enhancement & Standardization of Climate-Related Disclosures for Investors  
File Number: S7-10-22

Dear Chair Gary Gensler:

We the undersigned members of Green America thank you for the opportunity to comment on the historic, proposed climate rule “The Enhancement & Standardization of Climate-Related Disclosures for Investors.” We support the overall direction of the rule and urge the Commission to further strengthen it for maximum effectiveness as the climate crisis intensifies.

Green America works with investors, consumers, businesses, and supply chains to build an economy that supports social justice and environmental sustainability. The climate crisis is already profoundly disrupting lives, ecosystems, and the marketplace.

With limited time remaining to prevent the worst climate crisis impacts, we urge the SEC to do everything in its power to give investors and asset managers the comprehensive and comparable information needed to align their portfolios to meet the demands of the climate emergency. Climate disclosure mandates for public companies will also ensure the companies obtain the data needed to bring their operations in line with crucial greenhouse gas reduction goals and will give all stakeholders the understanding needed to advance climate solutions. Voluntary corporate disclosure of climate impacts and risks has fallen short of what’s needed.

We recommend the following provisions to further strengthen the rule:

- Ensure that free, prior, informed consent (FPIC) is obtained and recognized as material when consulting with Indigenous communities and any marginalized and frontline groups on resource extractive projects.

(continued)

- Require companies to disclose how they manage climate and community risks related to their business operations and climate mitigation and energy transition processes.
- Include reference to the United Nations Declaration on the Rights of Indigenous Peoples in line with other reporting frameworks such as the Global Reporting Initiative and the Sustainability Accounting Standards Board.
- Include nature-related financial impacts in climate risk disclosures as modelled by the Task Force on Nature-Related Financial Disclosure.
- Require disclosure of Scope 3 greenhouse gas emissions from large companies' value chains since in many cases, the majority of emissions are from Scope 3.
- Do not allow companies to decide whether or not their Scope 3 emissions are material and remove the safe harbor from liability for false Scope 3 reports.

We urge the SEC to approve the strongest climate disclosure rule and look forward to a positive outcome that supports human rights and communities, the environment, and the economy.

Sincerely yours,

15,239 signers
